PROFESSIONAL SUMMARY

Frontend Engineer with 3 years of experience building web applications with TypeScript, React, and Next.js. Shipped features for products with millions of users, including Manchester City F.C. (5M+ monthly visits) and a digital keys marketplace (3M+ monthly visits). Experienced in leading frontend development, from architecture decisions to deployment. Also builds production automation workflows with n8n.

WORK EXPERIENCE

| Frontend Engineer — WhiteTech | September 2025 - September 2026

- Digital Keys Marketplace

React, Vue, jQuery, Node.js, JavaScript, PHP, WebSocket, Jest | E-commerce, Marketplace | 3M+ monthly visits

- Sole frontend developer shipping features on a legacy project within tight deadlines
- Shipped a real-time messaging system with Vue 3 and WebSocket
- Integrated the messenger into a legacy JavaScript/jQuery/PHP codebase with no disruption to existing functionality
- Managed a complex local development environment independently using Ubuntu VM with Docker

- Web Application Builder Platform

React, Next.js, TypeScript, Storybook, Jest | SaaS, PaaS, No-code platform, Application builder | Startup

- Joined a no-code web application builder platform at pre-MVP stage
- Improved overall product quality by systematically resolving issues inherited from the prototyping phase
- Built 20+ Storybook components with full Jest coverage
- Configured tests, themes, docs, and Figma addons for Storybook
- Promoted to lead frontend on a high-priority production project (Digital Keys Marketplace) in recognition of consistent delivery

| Software Engineer — GlobalLogic | August 2023 - August 2025

- US Private Capital Fund Administration Service

React, jQuery, TypeScript, Jest | FinTech | $1.5T+ AuA, 12K+ fund entities, 500+ clients

- Delivered new features and improvements across a multi-app platform, working across both modern and legacy codebases
- Created test coverage, detecting and fixing more than 15 bugs
- Integrated backend API endpoints to coordinate features across multiple client-facing applications

- Video & Telemetry Streaming Application

React, Next.js, Node.js, TypeScript, WebSocket, HLS | Streaming, IoT, MilTech | Proof-of-concept built for a prospective client

- Owned the full lifecycle as the only frontend developer
- Built a real-time telemetry visualization interface that consumed live data streams with sub-second latency
- Developed a data emulator to generate and transmit telemetry signals, enabling development without physical hardware
- Implemented HLS video streaming alongside the telemetry dashboard, delivering a unified real-time monitoring interface
- Deployed and maintained the demo environment on a remote server, enabling live presentations to the prospective client

- Manchester City F.C.

React, Next.js, TypeScript, Storybook, i18next, Nx, Jest | Media, E-commerce | 5M+ monthly visits

- Contributed 20+ reusable components to the internal Storybook library, used across 3 production applications
- Replaced third-party UI components, improving Lighthouse score by ~15 points and eliminating ~200KB from the bundle
- Implemented REST API integrations, handling data transformation for centralized state management
- Resolved critical auth-flow bugs on legacy iOS versions, restoring login for thousands of affected users
- Promoted mid-engagement to lead frontend for a new division, bootstrapping its Next.js app from zero to demo in 4 weeks

SKILLS

- **Core:** JavaScript, TypeScript, React, Next.js, Vue.js, jQuery, Node.js
- **Markup & Styling:** HTML5, BEM, CSS3, SASS, Bootstrap, Tailwind CSS
- **State & Data:** Redux, MobX, Zustand, Zod, REST API, JWT, WebSocket, i18next
- **Tests & Tooling:** Jest, React Testing Library, Storybook, Nx, Git, Jira, Figma, Docker
- **Automation & AI:** n8n, Claude Code, Codex, Cursor, AI agents, Prompt Engineering
- **Languages:** English (Professional | C1), Ukrainian (Native), Russian (Native)

EDUCATION

Bachelor's Degree in Computer Engineering — Petro Mohyla Black Sea National University | September 2020 - June 2024

CERTIFICATES

- **Anthropic:** Claude Code in Action, Introduction to Agent Skills
- **n8n:** Full course track completed (4 courses, from Quickstart to AI, Testing & Best Practices)
